
THE CITY of BEVERLY
Engineering Department Weekly Bulletin

Ward-by-Ward

Issue No. 8 | April 14, 2022

Welcome to your weekly Engineering Ward-by-Ward update

City Wide Projects

We had a 3-Intersections progress meeting Tuesday morning. The contractor for the project, AR Belli, poured the remaining section of the North Beverly Fire Station driveway apron (see photo) as well as finished the construction of specific sidewalk sections within the Henry's intersection. AR Belli is starting construction at the Salem/Beverly Bridge Intersection (Intersection 1) today. They will begin the demolition of the traffic islands and area of pavement where they are doing full depth reconstruction (see photo). Next week they will begin construction on the curbing and sidewalks on the Mission Boathouse restaurant side of Cabot Street. The following week they will be constructing the sidewalks and curbing along Water Street. Use this link (<https://www.beverlyma.gov/414/Traffic-Improvements-at-Three-Intersecti>) to continue to follow all the 3-Intersections improvement updates.

National Grid Electric has hired a tree company to trim all of the branches around the power lines within the City.

Ward 1

We completed our initial door-to-door knocking for the entire Bridge St project as of Wednesday. Every house in which people were not home were left business cards for the residents to call us. We will be sending out a project package to the residents next week.

National Grid Gas has commenced construction on a new plastic main/services on Bates Park Ave and Sylvester St.

Ward 2

See the City Wide Update for 3-Intersection update.

Ward 3

See the City Wide Update for 3-Intersection update.

Ward 4

All the signage has been installed for the upcoming Cemetery Spring Clean up in the Central Cemetery and all others (see photo).

Ward 5

See the City Wide Update for 3-Intersection update.

National Grid Gas has commenced construction on a new plastic main/services on Colon Street.

Ward 6

The National Grid Electric sub-contractor has loamed and seeded most of their work areas (see attached photo sample) in the Thaxton Neighborhood. They still have some sidewalk repair work and other additional clean up work to finish.
